

TruckSafe[®] Standards

On-road Compliance

D.1 Mass, dimension and load restraint. The operator must develop, implement, and maintain procedures for complying with its mass, dimension and load restraint (MDLR) obligations.

D.2 Speed management. The operator must develop, implement, and maintain a speed management policy and procedures that promote a 'no speeding' culture amongst drivers and require scheduling practices that do not force or encourage drivers to exceed speed limits.

D.3 Driving hours and fatigue management. The operator must develop, implement and maintain policies and procedures to ensure it complies with its fatigue management obligations.

D.4 Regular reviews of on-road compliance procedures. The operator must carry out regular and triggered reviews of its MDLR, speed and fatigue management procedures.
