

TruckSafe® Standards

Training

C.1 Training policies and procedures. The operator must have policies and procedures that require relevant employees to have TruckSafe induction training, a refresher of that training every three years and ongoing training with a yearly assessment of their training needs.

C.2 Induction training. The operator must ensure that all relevant employees receive TruckSafe induction training before they start work.

C.3 Refresher training. The operator must ensure that all relevant staff receive a refresher of their TruckSafe induction training every three years.

C.4 Ongoing training. The operator must carry out a yearly training review of its business and then for all relevant employees. The operator must carry out the training that the review identifies as required.

C.5 Driver licenses and accreditations. The operator must have a system to ensure its drivers hold the correct licences and accreditations to operate their assigned vehicles and loads, and that those licenses and accreditations are current.
