

The following is an **excerpt** of the 2019 TruckSafe Standards for Standard B – Risk Management:

B.1 Risk Management

Your organisation, as a party in the supply chain, must implement a risk-based approach to manage safety and ensure compliance with all requirements of the Master Code.

B.2 Risk Assessment

Your organisation must complete a risk assessment in the context of your business for all identified risks relating to the four (4) CoR areas of Speed, Fatigue, Mass, Dimension, Loading and Load Restraint, and Vehicle Standards (Maintenance).

B.3 Risk Management Communication

Your organisation must make your documented risk management process available to staff.
